## FOREWORD

This Catalog is an offering from one Iris fancier to another.

For many years Iris have been our main love in flowers.

After experimenting with various species, we believe the tall Bearded Iris is the most satisfactory flower that can be grown in every part of the United States.

The Iris Test Garden was developed to further the appreciation of our favorite flower. The pleasure derived from it, far outweighs the effort and expense of keeping the garden up to date.

Every plant in the garden receives expert care and is carefully checked to develop good sound giant size rhyzomes.

You readers of American Iris Society Bulletins can quickly identify the genuine values offered here.

By using no color plates or elaborate catalog we are able to pass on to you at this low cost, high quality Iris in varieties that have been heretofore listed at very high prices.

We are not attempting to cover a long mailing list as many of our offerings are small and in some varieties only a few rhyzomes are available.

However, whatever the amount of your order; we will furnish you the best rhyzomes you have ever received, no matter where they came from in the past.

## AN OFFER TO HYDRIDIZERS

We find that in crossing Iris, that you will gain many years by using the newer varieties instead of the older ones.

Most of the newer varieties are introduced because of new color breaks and other qualities that make them more liable to give that shade or color we all are trying to obtain.

To those that are well advanced in hydridizing, we are going to make an offer, that we are sure, will give you Iris parents, that are the latest in Iris introductions, and will give you years ahead in crossing.

This offer we make is that you may select 100 (One only of any variety) of the best and highest priced Iris we have on our list, all your selection for \$200.00.

The only restriction is that you are not a dealer and will use these Iris for hydridizing.

We will spare two collections only at this price.

For 50 best Iris (One only of any variety) your selection from list, we offer these at \$125.00.

### SOMETHING UNUSUAL

To the Iris fancier who loves Iris and each year cannot resist buying the newer things, this department is addressed to you.

Any new rare Iris you may have a rhizome or so to spare, we offer you in trade anything we list of equal value you may want.

We of course are not interested in any thing we already have, but want Iris that have been introduced lately.

Write us what you have to offer, and what you want.

We still lack about 75 introductions of 1940-1941, that we want to plant and observe in our test garden.
